

Case Study

333 George St, Sydney NSW

333 George Street is a high-end award winning building in the heart of the CBD that Watpac were contracted by Charter Hall to complete.

With project positioned in the heart of the Sydney CBD, the proximity of surrounding buildings coupled with a very complex design amplified each and every site challenge.

Watpac engaged MSP to act as Project Director and work with both the Watpac and Charter Hall team to find the most effective way to navigate through the projects many challenges.

The completed product now forms a very unique part of the Sydney CBD architecture and MSP were proud to work with the outstanding Watpac team on this project.

333 George St, Sydney NSW

“ We are greatly appreciative of the services MSP provided for us on a recently completed CBD project. MSP were engaged on the project to leverage of their experience in managing challenging environments.

Mick took on the role as Project Director, dedicating 2.5 years of his time to managing a complex group of external stakeholders whilst also providing a mentoring role for the Watpac team to ensure project completion was achieved.

Without MSP’s involvement, the outcomes for the project would have been significantly different. Mick’s application of his contract knowledge, ability to maintain good team moral and his never give up attitude were instrumental in getting the project completed.

Mick / MSP, thank you from the Watpac team for your valued input!!
