

In collaboration with our clients, we help them establish strong foundations to build an innovative, forward thinking, successful business.

Case Study

Business Performance | Belconnen Concrete, ACT

The Spinelli family own or are major shareholders in three business entities in the Canberra region, being Belconnen Concrete, ACT Projects and Precast Projects.

The family sought assistance from MSP Projects to review the business structures, overall business reporting and controls being used to run the group.

As a result of the review, MSP Projects worked closely with the management team to implement an ownership restructure and in doing so a restructure of the financial debt and equity across the group.

The process allowed management to create an ownership structure for the future and to create management metrics that could easily be maintained to allow visibility of the business KPI's .

The three business entities still continue to use MSP Projects on a regular basis to review management issues and assist in major business decisions an independent peer reviewer.
